User Experience Design / UX

Professional Experience

Freelance Developer Foxhound Digital, Remote July 2018 to Current

- Developed and integrated a mobile-first service booking widget using JavaScript, jQuery, Bootstrap, and PHP resulting in an over 500% increase in leads, 200% growth in bookings, and a 7-fold boost to recurring revenue.
- Multiple WordPress sites with advanced CSS animations, mobile-friendly layouts, and MailChimp integration.

Design Lead FRONTSTEPS, Denver, Colorado February 2007 to July 2017

Turn-key CMS websites provided as SaaS for HOAs and their management companies.

- Wrote over 100 custom JavaScript / jQuery scripts to add customizations to websites for turn-key custom CMS.
- Worked with both internal and external stakeholders, championing usability, prototyping, and coding pixel-perfect layouts using clean HTML, CSS, and graphic assets for over 50 client-facing interfaces and features.
- Designed, prototyped and coded over 15 interfaces for an innovative mobile app that made it possible for thousands of Property Managers to easily and efficiently capture HOA violations.
- Managed an average of 30 simultaneous projects designing and coding the front-end for more than 60 custom websites designs per year ranging from small HOA boards to million-dollar management companies.

Training

Web Development Immersive General Assembly, Denver, Colorado March 2018 to June 2018
